Career Objective:

Artificial Intelligence and Data Science student focused on frontend development, skilled in building responsive, user-centric interfaces with modern web technologies. Seeking opportunities to contribute to real-world frontend projects while strengthening UI/UX, performance, and scalable web development skills.

Education:

Amrita Vishwa Vidyapeetam,Bengaluru

B.Tech. in Artificial Intelligence and Data Science , CGPA: 6.94 **July 2023 – Present**

Resonance Junior College, Hyderabad

Board of Intermediate Education, Percentage: 83.4 **July 2021 – May 2023**

KKR's Gowtham, Andhra Pradesh

Board of Secondary Education, Percentage: 83 **May 2021**

Projects:

Traffic Sign Recognition using Deep Learning

Tech: PyTorch, CNN, CBAM, Residual Networks, Attention Mechanisms

Designed a custom CNN architecture for traffic sign classification.

Integrated CBAM, Squeeze-and-Excitation, and Residual blocks to enhance feature learning.

Improved model performance through modular attention-based architecture design.

Flood Prediction using Regression Analysis

Tech: Python, Scikit-learn, Pandas

Developed a regression model to predict flood probability using 30,000+ records and 21 features.

Applied SelectKBest feature selection and L1 regularization for dimensionality reduction.

Performed EDA and built a structured ML pipeline for predictive analysis.

College Maintenance Management System

Full-stack website using HTML, CSS, JavaScript (frontend) and SQL (backend).

Built request tracking and maintenance management dashboards.

Technical Skills:

Languages: Java, C++, Python

Web: HTML, CSS, JavaScript

Core: OOP, DSA

Tools: Git, VS Code

Achievements and Certifications: AWS Academy Graduate - Cloud Foundations - 09/22/2025

Languages:

English: Professional Working Language

Telugu: Native

Japanese: Basic

Volunteering:

Volunteer, Robin Hood Army – Participated in food collection and distribution drives to support underprivileged communities.
